

GAUGE INDICATORS

FEATURES

- Indicators are used in hydraulic tanks on return line filters
- Measures the pressure drop through the filter elements, trip when the clogging of the filter elements causes a pressure drop increasing across the filter elements
- Working temperature up to 85°C
- Indicator is provided with a Bar and a PSI scale and the pointer indicates clog value
- Recommended for replacement of filter element maximum at 0.35 bar (5 psi) and suction filters maximum at 0.03 bar (0.5 psi).

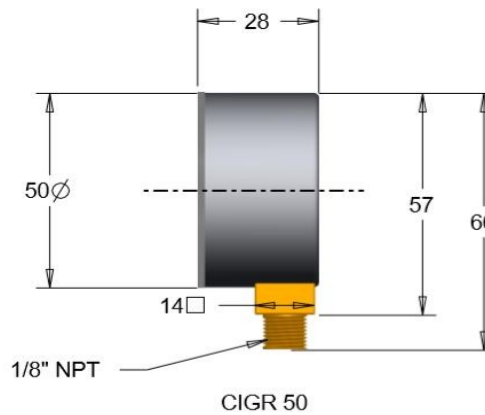

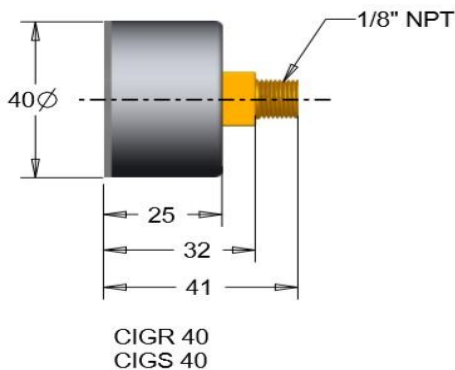

CLOGGING INDICATORS:

MODEL	TYPE	SIZE
GR	R-RETURN	40
GS	S-SUCTION	50

ORDERIG CODE: ASSMBLY

G	-R	-40	-BC
GAUGE	R-RETURN	40-DIA	BC-BACK MOUNT
	S-SUCTION	50-DIA	BT-BOTTOM MOUNT

Note: All dimensions are in mm for reference
